des brevets

The European Patent Office is currently recruiting

## Computer Systems and Dependable Computing Engineers

to work as Patent Examiners at its office in The Hague (NL).

Your profile:

- a thorough computer knowledge including computer hardware and computer architectures, a sound knowledge of electronics, software engineering from assembler to high-level languages
- national of an EPO member state
- a full university degree in engineering or a science
- good working knowledge of at least two of the EPO official languages (English, French and German) and willingness to learn the third before starting work as an examiner

Work experience in industry is not essential, but would be an advantage

The EPO offers :

- an intellectually stimulating job with technical, legal and linguistic dimensions
- a career offering a good work/life balance and job security
- long-term employment in an international environment at the forefront of technology, exemption from normal work- and residence-permit procedures
- an attractive salary, working conditions and social-security package (private medical insurance, pension scheme, relocation benefits and support)
- intensive initial training in all aspects of patent examination, follow-up courses and language training.

For more details on this position and many other vacancies to work as a Patent Examiner in our offices in Munich (DE), Berlin (DE) and The Hague (NL), as well as details on how to apply, visit our employment pages at

<http://www.epo.org/about-us/jobs/engineers-scientists.html>

Note : If you apply to one of these positions, please mention the Reference Target 2 at page 1 (section : how did you hear about this vacancy?) in the EPO online application form

The European Patent Office – the patent granting authority in Europe – is a self-financing intergovernmental organisation with over 6000 staff at four different locations. It currently has 32 member states and operates the fastest-growing regional patent system worldwide. Working for the EPO means supporting innovation, competitiveness and economic growth for the benefit of European citizens.
